

Fastlane[®] Floor Protector

Supplemental Floor Protection System

Fastlane Floor Protector is a modular system designed to enable usage of Fastlane turnstiles without the need for drilling fixing bolts into the floor or running a conduit for cables under the floor between pedestals.

Key Benefit

Floor Protector allows for quick, efficient and cost-effective installation of Fastlane optical turnstiles without damaging the floor of the building.

Applications

Floor Protector is ideal for applications where the flooring materials used (such as marble, tiles, granites, etc.) in the floor restrict drilling and cabling or where any such work would be prohibited. Additionally, the system is suited to temporary installations and sites where the tenants of a building are on a short-term lease and they do not want to affect the infrastructure of the building.

Accessibility

Floor Protector meets ADA specifications, and the angle and height of the ramp ensure ADA compliance and wheelchair-friendly access.

Technical Specifications

Dimensions:

Length: varies by turnstile model
Maximum Height: .78" (20 mm)
Standard Width: 26" (660 mm)
Wide Width: 36" (915 mm)

Material:

Mild steel

Cable Tray Dimensions:

1.9" x .6" (50 mm x 15 mm)

Slope Angle:

1 in 12

Color:

Varies by turnstile

Due to continuous improvements, specifications are subject to change without prior notice.
